

# How to Guide Climate Survey

A climate survey is an assessment tool used by academic leaders to measure the various co-curricular and extracurricular opportunities available to students.

4 steps on how to conduct a Climate Survey

What do you want to analyze?  
Who is your target audience?

How will you distribute the survey?

How will you collect the results?

How will you evaluate the results?

How will you further follow up?

How will you incorporate suggestions?

How will you make the necessary changes?
